

As a resident of West Virginia K-Love radio serves me in many ways. I travel about 60 miles one way to work. For most of the drive I am able to listen to this amazing station. In addition, as I travel to other states I am able to listen to a familiar, safe environment. K-Love allows me to hear a broad range of news from all across America. I am from a small area and if K-Love was not available there would most likely not be a local radio station with the means to replace this station with similar programming, certainly not one of such standards. The demand for such station is not always enough in small areas, but when added to a broader listening base it allows a greater range of people to become listeners. The service provided by K-Love is definitely in public interest. If it were not for K-Love radio, I am sure that most days I would be miserable in my drive across the West Virginia mountains. K-Love provides something most broadcasts do not--positive messages about hope, joy, love, peace. This is definitely something the world needs. This station allows listeners to hear the stories of how K-Love is affecting individual lives. There is also support staff on hand to answer questions for people and provide counseling and guidance. With K-Love you are never alone. Please do not do anything to jeopardize the services K-Love provides to me, West Virginia, or America.
